

Daily Checklist

Day 1 — Mon, Aug 10: Infra Foundation + Shell

- ☐ **Samanvitha:** Create the private GitHub repo, add everyone as collaborators, turn on branch protection for main. Set up the Azure DevOps project with 6 sprints.
- ☐ **Nihitha:** Create the Terraform remote state storage account + container (az cli). Create the GitHub Actions service principal. Add all required GitHub Secrets.
- ☐ **Archit:** Fill in infra/dev.tfvars, run terraform init/plan/apply. Verify every resource in the Azure Portal. Grant admin consent for Mail.Send. Update SQL schema: news_announcements, document_versions, watermark_settings, favorites, missing_policy_flags.
- ☐ **Sai Navya:** Review 2–3 real policy PDFs, finalize the chunking plan. Build the embedding script once Azure OpenAI is live.
- ☐ **Faiz:** Push infra/ + workflows into the repo. Build the backend skeleton, confirm the deploy pipeline runs. Once infra is live, build Connect to HR (Outlook/Teams links).
- ☐ **Sanaa:** Build the shared portal shell with role-based nav. Add Connect to HR buttons.
- ☐ **Samanvitha:** (once infra live) Confirm Entra ID login works, build the role check for the shared portal.

Day 2 — Tue, Aug 11: RAG Core + Chat UI

- ☐ **Samanvitha:** Test login + role switching across an employee and an HR account.
- ☐ **Nihitha:** Test search relevance as documents start flowing.
- ☐ **Archit:** Pair with Faiz/Sai Navya wherever the chatbot API or RAG pipeline needs backend support.
- ☐ **Sai Navya:** Build the core RAG function: question → search index → top chunks → prompt → Azure OpenAI → answer.
- ☐ **Faiz:** Build the chatbot API endpoint — calls the RAG function, returns answer + citation.
- ☐ **Sanaa:** Wire the chat UI to the chatbot API, display citations, test a real question end-to-end.

Day 3 — Wed, Aug 12: TIER 1 CHECKPOINT — Doc Pipeline + Resources **Must work by tonight**

Login + roles, cited chatbot answers, doc upload→approve→index, and the Resources page all must work by end of today.

- ☐ **Samanvitha:** Full regression test of everything above. Bug list, assign fixes.
- ☐ **Nihitha:** Build the approve/reject API logic — only approved docs get indexed.
- ☐ **Archit:** Build the Resources API's visibility enforcement (individual/department/manager/executive).
- ☐ **Sai Navya:** Build AI document categorization — suggest a category on upload.
- ☐ **Faiz:** Build the document upload API + categorization API wrapper.
- ☐ **Sanaa:** Build the HR "Upload & Manage Documents" page and the Employee "Resources" page.

Day 4 — Thu, Aug 13: Chat History + Live News + Personalization

- ☐ **Samanvitha:** Confirm ownership for every remaining feature with the team. Build the Favorites/recently-viewed backend (table + API).
- ☐ **Nihitha:** Build the Chat History API (save/retrieve conversations).
- ☐ **Archit:** Build the Live Company News table + API.
- ☐ **Sai Navya:** Add role, department, and tenure into the RAG prompt for personalization.
- ☐ **Faiz:** Wire the personalized RAG prompt into the live chatbot endpoint.
- ☐ **Sanaa:** Build the Chat History page UI and the Live News banner.

Day 5 — Fri, Aug 14: Secure Viewer + Dashboard + Policy AI

- ☐ **Samanvitha:** Build the Favorites/recently-viewed frontend UI (or pair with Sanaa). Full regression test of everything landed so far.
- ☐ **Nihitha:** Build the Top 3 FAQ storage/API + suggested-follow-up-questions API.
- ☐ **Archit:** Build Secure Document Viewer watermarking — static company watermark AND dynamic per-user watermark. Build document versioning (schema + "upload new version" API).
- ☐ **Sai Navya:** Build the AI Policy Update comparison (diff old vs. new version, generate a plain-language change summary). Build the Dashboard analytics query. Build the suggested-follow-up-question generator.
- ☐ **Faiz:** Build the Dashboard analytics API, the AI Policy comparison API ("Recently Updated Policies"), and the Secure Document Viewer API (permission check + watermark serving).
- ☐ **Sanaa:** Build the Secure Document Viewer UI, the Dashboard page (Chart.js), the "Recently Updated Policies" section, and the Favorites UI.

Day 6 — Sat, Aug 15: Missing Policy Detection + Freeze + Submit **No slack left — freeze tonight**

- ☐ **Samanvitha:** Full regression across the entire app, including every Tier 3 feature. Coordinate the freeze. Final pass, submit.
- ☐ **Nihitha:** Build the Chat History auto-delete Azure Function (7-day cleanup). Pair on the AI Missing Policy Detection backend — log unanswered questions, detect repeat topics.
- ☐ **Archit:** Build the Graph API email trigger for AI Missing Policy Detection. Fix backend/infra bugs from testing.
- ☐ **Sai Navya:** Build the AI Missing Policy Detection logic — detect when multiple employees ask about the same undocumented topic. Support tuning based on testing.
- ☐ **Faiz:** Build the Missing Policy Detection notification API. Fix backend bugs.
- ☐ **Sanaa:** Build the Top 3 FAQ widget + suggested-follow-up chips + document version selector. Final UI bug pass across everything.

Feature Ownership At A Glance

Feature	Backend	AI / Logic	Frontend
---------	---------	------------	----------

Login + roles	Samanvitha	—	Sanaa
RAG chatbot + citations	Faiz	Sai Navya	Sanaa
Doc upload/approve/index	Faiz, Nihitha	Sai Navya	Sanaa
Resources	Archit	—	Sanaa
Connect to HR	Faiz	—	Sanaa
Chat History (+ auto-delete)	Nihitha	—	Sanaa
Live Company News	Archit	—	Sanaa
Personalized responses	Faiz	Sai Navya	—
Secure Doc Viewer + watermark	Archit, Faiz	—	Sanaa
Dashboard & Analytics	Faiz	Sai Navya	Sanaa
AI Policy comparison/summary	Faiz	Sai Navya	Sanaa
Favorites/recently-viewed	Samanvitha	—	Samanvitha/Sanaa
Top 3 FAQ + follow-ups	Nihitha	Sai Navya	Sanaa
Document versioning	Archit	—	Sanaa
AI Missing Policy Detection	Archit, Nihitha	Sai Navya	HR inbox/email only

Emergency Cut List — Only If A Day Is Actually Collapsing

- ☐ **1:** AI Missing Policy Detection
- ☐ **2:** Document versioning
- ☐ **3:** Dynamic per-user watermark (keep static company watermark)
- ☐ **4:** Favorites/recently-viewed
- ☐ **5:** Top 3 FAQ + suggested follow-ups
- ☐ **6:** AI Policy comparison/summary
- ☐ **7:** Dashboard & Analytics
- ☐ **8:** Chat History auto-delete (keep chat history itself)

Never cut: Login, RAG chatbot + citations, Document upload/categorize/approve/index, Resources, Connect to HR.
