# 1. Executive Reporting Structure

Solid lines show direct executive reporting. Department detail and governance forums follow in the text sections.

The Board of Directors provides governance and oversight. The Chief Executive Officer is accountable for company strategy, performance, culture, and risk. Each executive leader owns a defined function and participates in the Executive Leadership Team. Dotted-line committees and project teams do not change the solid-line employment reporting relationship recorded in the HR system.

2. Functional Organization

| Executive function                 | Core departments                                                       | Primary accountabilities                                                       | Approximate headcount |
|------------------------------------|------------------------------------------------------------------------|--------------------------------------------------------------------------------|-----------------------|
| Chief Executive Officer            | Executive office, strategy, corporate communications                   | Company direction, Board matters, enterprise priorities, executive alignment   | 10                    |
| Chief Operating Officer            | Business operations, workplace, program management                     | Operating cadence, facilities, cross-functional execution, business continuity | 35                    |
| Chief Financial Officer            | Accounting, FP&A, payroll, procurement, travel and expense             | Financial control, planning, reporting, pay, purchasing, cash, risk            | 40                    |
| Chief Technology Officer           | Engineering, architecture, quality, IT                                 | Platform delivery, reliability, internal technology, technical standards       | 185                   |
| Chief Product Officer              | Product management, design, research, product operations               | Product strategy, roadmap, discovery, design, portfolio decisions              | 55                    |
| Chief Revenue Officer              | Sales, partnerships, marketing, revenue operations                     | New business, expansion, pipeline, pricing execution, market programs          | 140                   |
| Chief Customer Officer             | Customer success, professional services, support, training             | Implementation, adoption, support, renewals, customer outcomes                 | 120                   |
| Chief People Officer               | People operations, talent, total rewards, learning, employee relations | Workforce strategy, employment practices, benefits, culture, leadership        | 25                    |
| General Counsel                    | Commercial legal, privacy, compliance, corporate governance            | Contracts, legal risk, privacy, ethics, investigations, governance             | 10                    |
| Chief Information Security Officer | Security operations, GRC, product security, trust                      | Cybersecurity, security risk, incident response, assurance                     | 20                    |
| Total                              |                                                                        | Headcount snapshot as of 2026-08-01; use the HR system for current counts.     | 640                   |

3. Product and Engineering Structure

| Group                       | Leader                | Responsibilities                                                          |
|-----------------------------|-----------------------|---------------------------------------------------------------------------|
| Platform Engineering        | VP Engineering        | Core platform services, scalability, reliability, developer experience.   |
| Product Engineering         | VP Engineering        | BluePeak Flow, Connect, and Insight feature delivery.                     |
| Quality Engineering         | VP Engineering        | Test strategy, automation, release quality, performance validation.       |
| Architecture                | CTO                   | Technical direction, standards, major design decisions, technical debt.   |
| Product Management          | VP Product            | Product strategy, roadmap, requirements, outcome measurement.             |
| Product Design and Research | Chief Product Officer | User research, service design, UX, accessibility, design system.          |
| Product Operations          | Chief Product Officer | Planning cadence, launch readiness, product analytics, portfolio process. |

## 4. Revenue and Customer Structure

| Group                 | Executive owner                    | Responsibilities                                                      |
|-----------------------|------------------------------------|-----------------------------------------------------------------------|
| Sales - Americas      | Chief Revenue Officer              | New business and expansion in North and South America.                |
| EMEA Revenue          | Chief Revenue Officer with VP EMEA | Regional sales, partnerships, market development, local coordination. |
| Partnerships          | Chief Revenue Officer              | Technology, referral, implementation, and channel relationships.      |
| Marketing             | Chief Revenue Officer              | Brand, demand, product marketing, events, communications.             |
| Customer Success      | Chief Customer Officer             | Adoption, value realization, health, renewals, advocacy.              |
| Professional Services | Chief Customer Officer             | Implementation, configuration, training, and advisory services.       |
| Customer Support      | Chief Customer Officer             | Technical support, incident communication, knowledge, service levels. |

## 5. Corporate Functions

| Function                 | Executive owner                    | Key service teams                                                                   |
|--------------------------|------------------------------------|-------------------------------------------------------------------------------------|
| Finance                  | Chief Financial Officer            | Accounting, FP&A, payroll, procurement, travel and expense.                         |
| People                   | Chief People Officer               | People operations, talent acquisition, total rewards, employee relations, learning. |
| Legal and Compliance     | General Counsel                    | Commercial legal, privacy, corporate, compliance, investigations.                   |
| Information Technology   | Chief Technology Officer           | Service desk, enterprise applications, endpoint, identity operations.               |
| Information Security     | Chief Information Security Officer | Security operations, governance risk and compliance, product security, trust.       |
| Workplace and Operations | Chief Operating Officer            | Facilities, workplace experience, program management, business continuity.          |

## 6. Governance Forums

| Forum                             | Chair                    | Membership                                                        | Primary decisions                                                                    |
|-----------------------------------|--------------------------|-------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| Executive Leadership Team         | CEO                      | All executive leaders                                             | Enterprise strategy, operating priorities, major investments, risk.                  |
| Product Portfolio Council         | Chief Product Officer    | Product, Engineering, Customer, Revenue, Finance                  | Roadmap priorities, capacity, launches, portfolio trade-offs.                        |
| Security and Privacy Council      | CISO and General Counsel | Security, IT, Product, Engineering, Privacy, Customer, People     | Security risk, privacy impact, incidents, exceptions, assurance.                     |
| Revenue Review                    | Chief Revenue Officer    | Sales, Marketing, Customer, Finance, Product                      | Forecast, pipeline, pricing, renewals, market execution.                             |
| People and Compensation Committee | Chief People Officer     | CEO, CFO, Legal, selected executives                              | Workforce planning, compensation governance, talent and succession.                  |
| Business Continuity Team          | Chief Operating Officer  | Workplace, IT, Security, People, Communications, functional leads | Crisis coordination, site disruption, continuity priorities, employee communication. |

## 7. Decision and Escalation Principles

- 1 Employment managers are recorded in the HR system; project leaders and matrix partners do not automatically have employment authority.
- 1 Financial approval follows the delegated-authority matrix, not job title alone.
- 1 Production, privileged, customer-data, employee-data, payment, and legal authority require separate role-based approval.
- 1 A leader may delegate work but remains accountable for decisions within the leader's authority.
- 1 Material security, privacy, legal, safety, financial-control, or employee-relations concerns must be escalated to the owning function even when the business team believes it can resolve the issue.

## 8. Site and Legal Entity Alignment

BluePeak Technologies, Inc. employs U.S. employees. BluePeak Technologies Ireland Limited employs Dublin-based employees. Functional reporting may cross entities and locations, but payroll, benefits, employment terms, tax, and statutory obligations are administered by the employing entity and approved work location.

## 9. Chart Maintenance

People Operations updates reporting lines and department assignments in the HR system. Corporate Communications publishes the controlled organization chart after approved executive or functional changes. Temporary project structures are maintained in project documentation and are not added unless they materially affect the operating model.

## 90. Administration, Exceptions, and Questions

BluePeak administers the organizational chart consistently with the employee's work location, employment classification, written employment terms, and applicable law. A statutory or contractual entitlement that is more generous than this document will apply to the extent required. A manager may not waive a legal requirement, create a new benefit, or promise an exception without written approval from the document owner.

Employees should raise questions before relying on an informal interpretation. Contact [corporatestrategy@bluepeaktech.com](mailto:corporatestrategy@bluepeaktech.com) through Outlook or the People Help channel in Microsoft Teams. Payroll, Legal, Information Security, or a site leader will be consulted when the question involves tax, wage-and-hour, privacy, immigration, safety, or local-law considerations.

Approved exceptions must identify the employee, the policy provision, the business reason, the approving authority, the start and end date, and any conditions. Exceptions are stored with the employee or transaction record and do not establish a precedent for other employees.

## 91. Related Documents and Systems

| Resource                      | When to use it                                                                       |
|-------------------------------|--------------------------------------------------------------------------------------|
| Employee Directory & Contacts | Names, emails, service contacts, site information, and urgent escalation routes.     |
| Employee Handbook             | Employment authority, reporting concerns, business conduct, and workplace practices. |
| Company Code of Conduct       | Leader responsibilities, conflicts, decision authority, and ethical escalation.      |
