## Quick Answers

| Question                                | Rule                                                                                                                     |
|-----------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| How much sick leave is provided?        | Full-time employees receive 10 paid days per calendar year; eligible part-time employees receive a prorated amount.      |
| When can a new hire use it?             | From the first day of employment; there is no waiting period.                                                            |
| Does it carry over?                     | No. Unused company sick leave expires December 31 unless local law requires carryover.                                   |
| When may documentation be requested?    | After 3 consecutive scheduled workdays, for a pattern of misuse, or when required for a leave or return-to-work process. |
| Is unused sick leave paid when I leave? | No, unless applicable law requires payment.                                                                              |
| Should I work remotely when ill?        | Only if you are able to work safely and productively and your manager agrees. Otherwise use sick leave.                  |

Privacy rule: Tell your manager the expected absence and work impact, not your diagnosis. Medical documentation must be sent through the confidential People Operations process, not stored in a team folder or ordinary email thread.

## 1. Purpose and Scope

Paid sick leave allows eligible employees to address health and safety needs without losing regular pay. It applies to regular U.S. employees scheduled at least 20 hours per week. Dublin employees receive sick-pay and medical-absence treatment under local terms and law.

This policy provides the company sick-leave bank. It does not limit statutory sick leave, disability accommodation, workers' compensation, family and medical leave, pregnancy-related leave, or another protected right.

## 2. Eligibility and Annual Amount

Full-time employees receive 10 paid sick days per calendar year, accrued at 0.83 day per month. Regular part-time employees scheduled 20 to 29 hours per week receive a prorated amount based on scheduled hours divided by 40. Sick leave is available from the first day of employment.

Unused company sick leave expires on December 31 and does not carry over, except where local law requires carryover or frontloading treatment. The HR system may display a separate legally required balance for a particular work location.

Sick leave is not paid out at separation. If an employee is rehired within 12 months, a legally required balance is restored when required; the company-provided balance otherwise starts under the current-year schedule.

## 3. Permitted Uses

Sick leave may be used for:

- the employee's physical or mental illness, injury, symptoms, diagnosis, treatment, preventive care, or recovery;
- medical, dental, vision, behavioral-health, reproductive-health, or therapy appointments;
- care or assistance for a spouse, domestic partner, child, parent, sibling, grandparent, grandchild, household member, or another person whose close association is equivalent to family;
- public-health closure, quarantine, isolation, exposure guidance, or testing affecting the employee or covered family member;

- 1 needs related to domestic violence, sexual assault, stalking, or another safety situation, where covered by company policy or law; and
- 1 time needed to obtain a medical assessment after a workplace injury.

Sick leave is not intended for vacation, routine personal errands, outside employment, or an absence unrelated to health, care, or safety. People Operations will help select the correct leave when circumstances overlap.

## 4. Reporting an Absence

Notify your manager before the scheduled start time when reasonably possible. If an emergency prevents direct notice, a family member or other person may notify the manager. State that you are unable to work, the expected duration if known, urgent coverage information, and how you can be reached for administrative updates. Do not provide a diagnosis in the team channel.

Record the absence in the Employee Portal or Leave Request Form as soon as practicable. Non-exempt employees record the actual hours missed. Exempt employees normally record half-day or full-day absences for balance purposes.

If the expected return changes, update the manager. Daily notice is not required when an approved leave period already identifies the expected duration, unless the circumstances materially change.

### 4.1 Working From Home While Unwell

A Hybrid or Onsite employee may work remotely for a short illness only when the employee can perform the role safely and productively, the work does not risk others or confidential information, and the manager approves. An employee who is too ill to work should use sick leave and is not expected to monitor messages.

## 5. Medical Documentation

People Operations may request reasonable documentation after 3 consecutive scheduled workdays of absence, for an intermittent pattern that reasonably suggests misuse, to support a protected-leave or accommodation process, or to confirm fitness for a safety-sensitive return. Documentation requirements are waived or adjusted where prohibited by law.

Documentation should confirm the need for absence, relevant functional restrictions, and expected duration. It should not include detailed medical history unless specifically required for a formal process. Managers must forward medical documents to People Operations and delete local copies.

Failure to provide requested documentation after reasonable notice may affect pay or leave designation, but People Operations will consider access barriers, medical delays, emergencies, and legal limits before making a decision.

## 6. Extended, Intermittent, and Recurring Absence

Contact People Operations when an absence is expected to exceed 5 scheduled workdays, may recur, involves hospitalization or a serious health condition, results from a workplace injury, or may require a schedule or duty adjustment. People Operations will evaluate protected leave, short-term disability, workers' compensation, and accommodation.

An approved intermittent leave identifies the expected frequency, duration, notice process, and time code. Employees should report only the occurrence and work impact to the manager; medical details remain with People Operations.

Sick leave may be used during a disability elimination period or to supplement disability pay when permitted. Sick leave and a protected leave may run concurrently while the employee continues to receive the protections of the designated leave.

## 7. Return to Work

Return-to-work clearance may be required after 15 or more consecutive calendar days, hospitalization, a communicable-disease exclusion, a safety-sensitive restriction, or when credible information raises a direct safety concern. The clearance should address ability to perform job functions and needed restrictions, not a full diagnosis.

BluePeak will consider reasonable accommodation and transitional duties. An employee must not be required to remain away merely because of a disability or medical condition when the employee can work safely with an effective accommodation.

## 8. Pay, Benefits, and Accrual

Approved sick leave is paid at the employee's regular base rate for the scheduled hours missed. It does not include overtime, shift premium, commission, bonus, allowance, or other variable pay unless a written plan requires it. Benefits continue as if the employee worked while using paid sick leave.

PTO accrual continues during paid sick leave. The separate sick-leave bank does not accrue during unpaid leave or disability leave after paid sick time is exhausted, except where required.

## 9. Misuse and Attendance Management

BluePeak may investigate falsified documentation, use of sick leave for outside employment or vacation, repeated failure to follow notice procedures without a valid reason, or other credible misuse. Protected, approved, or legally covered absences are not counted as attendance misconduct.

Managers must consult People Operations before issuing corrective action for health-related absence. A pattern alone does not establish misuse; the review must consider protected leave, disability, recurring treatment, caregiving, and location-specific law.

## 10. Infectious Illness and Workplace Health

Employees should not report onsite when they have a fever, vomiting, uncontrolled symptoms, a medical direction to isolate, or another condition that creates a material transmission risk. Follow public-health, medical, and BluePeak guidance. Managers may send an employee home when objective symptoms create a reasonable workplace health concern and must involve People Operations for continued exclusion.

## 11. Frequently Asked Questions

### 11.1 Can I use sick leave for therapy?

Yes. Mental-health treatment, counseling, and recovery are covered uses.

### 11.2 Do I need a doctor's note for one day?

Normally no. Documentation may be requested for a pattern of suspected misuse or a formal leave process, subject to law.

### 11.3 Can I use sick leave for a child's appointment?

Yes, for a covered family-care need.

### 11.4 What happens when I use all 10 days?

Contact People Operations. PTO, unpaid leave, disability benefits, accommodation, or protected leave may apply depending on the circumstances.

## 11.5 Will my manager see my diagnosis?

No. Managers receive work-status and restriction information needed to administer the absence, not confidential medical details.

## 90. Administration, Exceptions, and Questions

BluePeak administers Sick Leave and medical absence consistently with the employee's work location, employment classification, written employment terms, and applicable law. A statutory or contractual entitlement that is more generous than this document will apply to the extent required. A manager may not waive a legal requirement, create a new benefit, or promise an exception without written approval from the document owner.

Employees should raise questions before relying on an informal interpretation. Contact [people@bluepeaktech.com](mailto:people@bluepeaktech.com) through Outlook or the People Help channel in Microsoft Teams. Payroll, Legal, Information Security, or a site leader will be consulted when the question involves tax, wage-and-hour, privacy, immigration, safety, or local-law considerations.

Approved exceptions must identify the employee, the policy provision, the business reason, the approving authority, the start and end date, and any conditions. Exceptions are stored with the employee or transaction record and do not establish a precedent for other employees.
